

SAFER FASTER SMARTER

With advanced detectors and algorithms, Temperature Screening and Thermographic Cameras are designed to detect elevated skin-surface temperatures, and can thus be used for rapid and preliminary temperature screening in office buildings, factories, stations, airports and other public places, with accuracy up to $\pm 0.3^{\circ}\text{C}$.

**Temperature Screening
Thermal Solutions**

Thermal Camera

PC Client

Measurement System Composition (For Option 01 & 02)

RTI-100

is composed of AI binocular temperature detecting camera and AI thermal imaging screening system. Integrated by thermal temperature detecting sensor of high-accuracy, built-in intelligent face recognition algorithm, using a database and ISP image processing technology, the device provides face recognition, temperature measurement and face capture.

Up to
100
people per
minute live
monitoring

AED
9,000.00
Per Unit

Microstrategies Thermal Imaging Screening & Temperature Detecting Camera

Detection distance 1.5-3.5m

AI Binocular Thermal Imaging Camera

High-precision body temperature measurement

High and low temperature tracking

Accuracy $\pm 0.3^\circ\text{C}$

Real-time image transmission

High temperature alarm

256X192 High resolution

Temperature range -15°C to $+150^\circ\text{C}$

Up to **30** people per minute live monitoring

AED 6,900.00 Per Unit

 12µm	256×192 Resolution	±0.5°C ±0.3°C with blackbody High accuracy
0.15~2m Measurement distance	WLP Water level packaging	30~45°C Temperature measurement range

Up to 10 people per minute live monitoring

AED 5,900.00 Per Unit

SORS Fever Screening System

Creativity delivered Flawlessly...
